

ActiveGuard® Tiered Services

Service Tiers Designed to Match Customer Needs

NTT Security offers multiple service tiers to meet the needs of individual clients. The patented, cloud-based ActiveGuard® Security and Compliance platform enables organizations to quickly and cost-effectively improve their security posture by protecting critical assets with flexible services tailored to address specific needs and/or compliance requirements.

Because not every device or application requires the same solution, we offer tiered service levels that enable clients to create the perfect compliance or security monitoring program for their organization.

Service Tiers

ActiveGuard Enterprise – This service tier provides reviews of events and delivers the most proactive security, including 24/7 security log monitoring, a dedicated service delivery team and the ActiveGuard security portal. This service tier is ideal for enterprises that need to outsource security monitoring and/or management, and

perfect for organizations with compliance requirements including PCI, SOX, GLB, HIPAA, HITRUST, FFIEC, etc.

ActiveGuard PCI – This offering is specifically designed to help clients meet the log monitoring and management requirements of the PCI DSS. This service tier is ideal for any organization with a PCI compliance requirement.

ActiveGuard HPA – This SOC-augmented service is designed for environments that require fast, 24/7 response for high priority alerts (HPA). This service tier is ideal for clients who want to proactively address the most critical threats to their environment.

ActiveGuard SIEM – This streamlined, SIEM-as-a-service offering is designed for clients who need a cost-effective log aggregation and correlation solution. This solution is ideal for organizations that want to maintain and manage security and compliance initiatives internally.

Features Include:

- 24/7 Log Collection and Active Monitoring
- Security Event Escalation and Context-aware Alerting
- Advanced Analytics to Detect Threats
- Multiple Security Operations Centers (SOCs)
- Analysis and Validation by Certified Security Experts
- Patented ActiveGuard Service Platform
- Configurable Analytic Rules and Thresholds - Threats, Privileged Users and Policy Enforcement
- Cross-Device Correlation
- 100% Retention of Collected Logs
- Flexible Service Tiers
- Dedicated Service Delivery Manager
- Broad Device Count - Support for Over 200 Devices
- Customizable Web-based Portal
- Rapid Deployment

Compliance & Security Support	All Alerts	Ad-hoc	High Priority Alerts	n/a
Log Retention Online/Offline	90 days/one year	90 days/one year	90 days/one year	90 days/one year
Portal Access	Included	Included	Included	Included

ActiveGuard Tiered Services

A Partner You Can Trust

We don't believe that one size fits all. That's why we deliver a cybersecurity, risk management and compliance program that is as unique as your business. Our goal is to ensure that every organization develops the cyber resilience required to make the most of every business opportunity. We can provide the solution you need in the manner best suited to your specific situation and help you to avoid technical blind alleys, missed exits and roads that lead to nowhere.

The Full Security Life Cycle

NTT Security has created a Full Security Life Cycle model based on many years of providing efficient and effective security, risk and compliance services to organizations around the world. We deliver these services using local resources that leverage our global capabilities.

Plan & Optimize

We'll build a plan that considers your level of risk, potential regulatory and financial impact, ICT environment and staff capabilities; and work with you to optimize your existing security and compliance processes and controls. With a focus on enabling meaningful success criteria, budget and specific solutions to be implemented, our recommendations may range from a straightforward review and suggestions for improvement, to a study of alternative or supplementary solutions.

Architect & Deploy

Getting the most value from security solutions requires experience and expertise

in both market-leading technology and delivering change, to reduce risk and make new implementations work seamlessly with your organization's business processes. Our security experts have the training and experience to ensure the right solutions are architected, configured and deployed to solve your security challenges.

Manage & Operate

High-performing security and compliance programs are built on processes and controls that are executed efficiently and consistently while producing the data necessary to monitor and manage their effectiveness within your organization. Effectively managing and operating the controls in your security and compliance program will increase your organization's understanding of your security posture, security and compliance exceptions, effectiveness of controls, and demonstrate cost-effectiveness to executive management.

Respond & Educate

Cyber resilience is based on the premise that incident avoidance is not always possible – you need to be ready and able to effectively respond to a security incident. Should the worst occur, our incident response team can be quickly engaged either remotely or on site. They will identify, document, contain and remediate a security incident to minimize the impact to your organization. We can also develop a comprehensive program for the security education of your organization.

About NTT Security

NTT Security seamlessly delivers cyber resilience by enabling organizations to build high-performing and effective security and risk management programs, with controls that enable the increasingly connected world and digital economy to overcome constantly changing security challenges. Through the Full Security Life Cycle, we ensure that scarce resources are used effectively by providing the right mix of integrated consulting, managed, cloud, and hybrid services – delivered by local resources and leveraging our global capabilities. NTT Security is part of the NTT Group (Nippon Telegraph and Telephone Corporation), one of the largest information and communications technology (ICT) companies in the world. For more information, visit www.nttsecurity.com.

The NTT Security Difference

We provide the necessary services across the entire information and communications technology (ICT) stack and throughout the Full Security Life Cycle. Our services portfolio covers every aspect of information security and risk management, from initial assessment through to strategic program planning, hands-on deployment and around-the-clock management and support. Service options include:

- Security Program Optimization and Enterprise Advisory
- Security Planning and Risk Assessment
- Risk and Compliance Management
- Security Solution Design and Integration
- Managed Security Services
- Cloud and Data Centre Services
- Threat Mitigation and Remediation Strategy
- Incident Response and Forensics
